SUMMARY

Computer Science undergraduate with hands-on experience building full-stack web applications using React.js, Node.js, Express.js, MongoDB, and REST APIs. Solved 200+ Data Structures & Algorithms problems across LeetCode and CodeChef, with strong foundations in DSA, OOP, DBMS, and Operating Systems. Experienced in developing authentication, role-based access control, CRUD operations, and responsive web interfaces. Currently exploring data analytics and LLM-based application development.

PROJECTS

Employee Presence Analytics | Power BI, Excel, SQL

2026

- Developed an interactive employee attendance and presence analytics dashboard using Power BI to monitor attendance, WFH, leave, and presence trends.
- Cleaned and transformed employee attendance data using Excel and SQL, handling missing values, inconsistent records, and date/time fields.
- Created DAX measures and KPIs for Presence %, WFH %, leave trends, employee-level attendance, and overall workforce metrics.
- Designed interactive visualizations with filters and slicers to enable analysis of attendance patterns across employees, dates, and work modes.

Zerodha Clone | React.js, Node.js, Express.js, MongoDB

2026

- Developed a responsive stock trading platform clone inspired by Zerodha, implementing user authentication, dashboard, portfolio, and stock-related functionality.
- Built reusable frontend components using React.js and implemented RESTful APIs using Node.js and Express.js.
- Integrated MongoDB for storing user, portfolio, and transaction-related data with CRUD operations.
- Implemented secure authentication and authorization mechanisms to manage user access and application functionality.

CollabRoom | Next.js, TypeScript, Clerk, GetStream, Tailwind CSS

2026

- Built a real-time video conferencing web application using Next.js and TypeScript, enabling users to create, join, and manage virtual meetings.
- Implemented user authentication and authorization using Clerk for secure account and session management.
- Integrated GetStream to provide real-time meeting functionality including video calls, participant management, screen sharing, and meeting controls.
- Developed features for instant meetings, scheduled meetings, meeting links, and responsive meeting interfaces using Tailwind CSS.

EDUCATION

INSTITUTE OF ENGINEERING & TECHNOLOGY

Lucknow, India

Bachelor of Technology in Computer Science & Engineering
CGPA: 8.4 / 10

2025-2028

GOVERNMENT POLYTECHNIC JHANSI

Jhansi, India

Diploma in Mechanical Engineering
Percentage: 74%

2021-2023

SKILLS

Languages:	C++, C, Java, Python, JavaScript, SQL
Web Development:	React.js, Node.js, Express.js, Next.js, REST APIs, HTML, CSS, Tailwind CSS
Databases:	MongoDB, MySQL
Data Analytics:	Power BI, DAX, Excel
Core CS:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Developer Tools:	Git, GitHub, VS Code
